

Alex Miller

milleral@nmu.edu | (906)235-4870 | Sault Ste. Marie, MI 49783 | [Portfolio](#) | [Github](#)

Computer Science graduate with professional experience in biometric quality assurance and a strong foundation in software engineering. Skilled in software development, full-stack engineering, adapting to complex systems, and technical troubleshooting with interests in cybersecurity.

Skills

Languages: C++, Java, Typescript, Javascript, Python

Web Development: React, Angular, Node, Next, Vercel, Neon, HTML, CSS

Tools: Windows, Linux, Docker, Git, SQL, SQLite, PostgreSQL, Prisma

Concepts: Object-Oriented Programming, Networking, REST APIs, Data Structures, Algorithms

Work Experience

Isle Royale Line Inc. | Crew Member | Summers 2022-2026 | Copper Harbor, MI 49918

- Collaborated with fellow crew members to ensure safe operations
- Communicated with passengers to resolve issues and answer questions
- Earned repeated seasonal employment with reliability, work ethic, and adaptability

iBeta Quality Assurance | Biometrics Tester | March-October 2026 | Aurora, CO 80014

- Conducted biometric presentation attack detection testing following ISO/IEC standards
- Supported teammates to resolve issues with client's software before or during testing
- Analyzed documents and spreadsheets were correct and up to date during testing

Education

Northern Michigan University | Marquette, MI 49855

- B.S of Science - Computer Science, minor in Mathematics - Graduated: May 2025
- A.S of Science - General Education - Graduated: Dec 2023

Projects

Capture The Flag | Full-Stack Site | Senior Project

- Followed software development life cycle building a site for a client
- Practiced Agile Methodologies such as: sprints, planning, feedback, and adapting
- Integrated real time interaction with Docker environments as terminals

[Northern Kyber](#) | **CTF Full-Stack Site | SaaS**

- Re-engineered Senior Project built towards deployment and consumer facing SaaS
- Established new systems and frameworks for better maintainability and efficiency
- Enhanced platform security with session management and access controlled APIs
